Part II Reading Comprehension (40%)

Passage 1

If you are going to be a straight talker, you have to believe that it's a virtue, that it's an quality you want to have.

If you have an opinion and you just state it, it allows the other person to either try to challenge your opinion, to

agree with you, or to disagree--they have an action they can take. If you are quiet, people think you agree. How can

you then further the conversation when you are at different points and it's not really exposed? Agreeing is easy.

Disagreeing takes more guts.

Several years back, when I was CEO at a company, there was a very senior woman who was very smart and well spoken, but she did not wear appropriate clothes. It was distracting and she was not being taken seriously. I said

to her manager, who was male, "You need to tell her." He said, "Oh, no way."

So I called her in and directly stated what I thought was happening, "You're not getting the respect you deserve," I said, "Go to the store and get a personal shopper. Just say, 'I am a senior businessperson and need help

dressing formally.'" She came back, and she was completely a different person. She said she felt really good. And

currency went way up.

Early in my business career, if people asked me a question, I'd try to answer it honestly. And that was rewarded. I had managers who wanted me around because I would actually tell them what was happening.

I was raised by my grandma, and she was a pretty straight talker because she thought you could handle it. My

advice is to be realistic. Being honest and truthful is part of being a good friend, a good associate, and a good leader.

31. The woman did not get promoted because she did not .

- A. dress appropriately B. take her work seriously
- C. get on well with her colleagues D. follow her manager's instructions

32. The underlined phrase "takes more guts" in paragraph 2 refers to .

- A. demand more wisdom B. attract more attention
- C. take more courage D. need more communication

33. According to the writer, talking in a straight way allows one to .

- A. become an opinion leader B. make friends easily
- C. become a respectable person D. take further action

34. From the last paragraph, it can be inferred that the writer tends to talk frankly possibly due to the influence of .

- A. his workmates B. his leaders
- C. his friends D. his family

35. Which of the following might be the best title of the passage?

- A. Straight Talker B. Different Opinions
- C. Agree or Disagree D. Importance of Speech

Passage 2

A punctual person is in the habit of doing a thing at the proper time and is never late in keeping an appointment.

www.gzzkgk.cn The unpunctual man, on the contrary, never does what he has to do at the proper time. He is always in a hurry

and in the end loses both time and his good name. A lost thing may be found again, but the lost time can never be

regained. Time is more valuable than material things. In fact, time is life itself. The unpunctual man is forever wasting and mismanaging his most valuable asset() as well as other' s. The unpunctual person is always complaining that he finds no time to answer letters, return calls or keep appointments promptly. But the man who

really has a great deal to do is very careful of his time and seldom complains of want of it. He knows that he can get

through his huge amount of work unless he faithfully keeps every piece of work when it has to be attended to.

Failure to be punctual in keeping one's appointments is the sign of disrespect towards others. If a person is invited to dinner and arrives later than the appointed time, he keeps all the other guests waiting for him. Usually this

will be regarded as a great disrespect to the host and all other guests present.

Unpunctuality, moreover, is very harmful when it comes to do one's duty, whether public or private. Imagine how it would be if those who are put in charge of important tasks failed to be at their proper place at the appointed

time. A man who is known to be habitually unpunctual is never trusted by his friends or fellow men.

36. The main difference between a punctual person and an unpunctual person is that a punctual person .

- A. has lots of appointments while an unpunctual one has few appointments
- B. does everything at the right time while an unpunctual one seldom does so
- C. has much time to do everything while an unpunctual one has little time to do anything
- D. does everything ahead of time while an unpunctual one does everything behind schedule

37. What is the main reason why a person is always unpunctual according to the passage?

- A. He doesn't care much about time.
- B. He is much busier than other people.
- C. He is always in a hurry when he works.
- D. He always mismanages and wastes his time.

38. The third paragraph is developed by giving .

A. a fact B. an opinion C. an example D. an evidence

39. It can be inferred from the last paragraph that .

A. an unpunctual person usually loses his friends

B. an unpunctual person often fails doing any important task

C. unpunctuality may result in fewer appointments and opportunities

D. unpunctuality may lead to heavy losses for both public and private affairs

40. What does the passage mainly talk about?

A. Valuable time B. Popular appointment

C. Harm of unpunctuality D. Advantage of punctuality

Passage 3

Once upon a time, two brothers, Jack and Tom, who lived on neighboring farms, fell into conflict. For the past 20 years, they had been on good terms farming side by side, sharing machinery, and trading labor and goods as

needed. The dispute began with a small misunderstanding and grew into a major difference, and finally exploded

into an exchange of bitter words followed by weeks of silence.

One morning there was a knock on Jack's door. It was a carpenter looking for a few days' work. Jack offered him a job saying, "Look across the stream at that farm. That's my neighbor; in fact, it's my younger brother.

There used to be a meadow between us. Last week he pulled down the dam on the small river and now there is a

stream instead. Well, he may have done this to offend me, but I'll do him one better."

"See that pile of lumber () by the house? I want you to build me a fence--an 8-foot fence." The carpenter said, "I think I understood the situation. Show me the nails and the post-hole digger and I'll be able to

do a job that pleases you."

Jack had to go into town, so he helped the carpenter get the materials ready and then he was off for the day.

The carpenter worked hard all that day measuring, sawing and nailing. About sunset when Jack returned, the carpenter had just finished his job.

www.gzzkgk.cn Jack's eyes opened wide, his jaw dropped. There was no fence there at all. It was a bridge--a bridge

stretching from one side of the stream to the other! A fine piece of work! His younger brother was coming toward them with hands outstretched. "You are quite a fellow to build this bridge after all I've said and done." The two brothers stood at each end of the bridge, and then they met in the middle, taking each other's hand. They turned to see the carpenter lift his toolbox onto his shoulder. "No, wait! Stay a few days. I have a lot of other projects for you," said Jack. "I'd love to stay on," the carpenter said, "but I have many more bridges to build."

41. In the past 20 years, Jack and Tom kept their relationship .

A. serious B. tense C. distant D. close

42. Jack decided to build a fence to .

A. protect himself B. fight back

B. please Tom D. give in

43. What does the underlined expression "quite a fellow" mean in paragraph 5?

A. A powerful man. B. A rich man.

C. A generous man. D. A capable man.

44. The carpenter built the bridge instead of a fence to help Jack and Tom .

A. meet each other B. store the lumber

C. regain brotherly affection D. renew their business

45. What can we learn from the passage?

A. Better make friends than make enemies.

- B. A good friend brings a far land near.
- C. Family ties are closer than social relations.
- D. A tooth for a tooth.

Passage 4

Batteries can power anything from small sensors to large systems. While scientists are finding ways to make them smaller but even more powerful, problems can arise when these batteries are much larger and heavier than the devices themselves. The researchers at University of Missouri (MU) are developing a nuclear energy source that is smaller, lighter and more efficient.

"To provide enough power, we need certain methods with high energy density (),," said Jae Kwon, assistant professor of electrical and computer engineering at MU, "The radioisotope () battery can provide power density that is much higher than chemical batteries."

www.gzzkgk.cn 020-8828266715374053589

Kwon and his research team have been working on building a small nuclear battery, presently the size and thickness of a penny, intended to power various systems. Although nuclear batteries can cause concerns, Kwon said they are safe.

"People hear the word 'nuclear' and think of something very dangerous," he said, "However, nuclear power sources have already been safely powering a variety of devices, such as pace-makers, space satellites and underwater systems."

His new idea is not only in the battery's size, but also in its semiconductor. Kwon's battery uses a liquid semiconductor rather than a solid semiconductor.

"The key part of using a radioactive battery is that when you harvest the energy, part of the radiation energy can damage the lattice structure () of the solid semiconductor," Kwon said, "By using a liquid semiconductor, we believe we can minimize that problem."

Together with J. David Robertson, chemistry professor and associate director of the MU Research Reactor, Kwon is working to build and test the battery. In the future, they hope to increase the battery's power, shrink its size and try with various other materials. Kwon said that battery could be thinner than the thickness of human hair.

www.gzzkgk.cn 46. The passage gets started by.

- A. an introduction B. an example
- C. a question D. a conclusion

47. What do you know about Jae Kwon?

- A. He is teaching chemistry at MU.
- B. He developed a chemical battery.
- C. He was good at computer engineering.
- D. He is working on nuclear energy source.

48. Which of the following is true according to paragraph 3 and 4?

- A. The writer introduces methods of providing power density.
- B. The writer intends to describe a nuclear-powered system.
- C. The writer introduces nuclear batteries can be safely used.
- D. The writer is likely to show chemical batteries are widely applied.

49. Liquid semiconductor is used to .

- A. control the lattice structure
- B. show the size of nuclear batteries
- C. decrease the size of nuclear batteries
- D. reduce the damage to lattice structure

50. The passage is most probably from a .

- A. science news report B. book review

C. science fiction novel D. newspaper advertisement
